Industrial Engineering

Indices, 1990
Volume 22

Microfilm copies of articles are available from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106. Paper copies can also be obtained from the Publications Order Department, IIE, 25 Technology Park, Norcross, GA 30092, Phone 404-449-0460, for $4.00 each, prepaid.

Subjects and titles

ARTIFICIAL INTELLIGENCE
Expert systems join the navy: artificial intelligence is applied to procurement; Velazco, Enio E.; August; p. 46.
Expert systems remove repetitive tedious work for customer order entry; Jindia, A.K.; November; p. 51.
U.S. Army builds an AI diagnostic expert system, by soldiers for soldiers; Keller, Cpt. Brian C.; Knutilla; Cpt.Thomas R.; September; p. 38.

AUTOMATION
A management guide to automation cost justification; Badiru, Adedeji B.; February; p. 26.
"Fully automated" isn't always the best solution to your warehouse operations; Johnson, James P.; July; P. 30.

BAR CODING
Bar code data collection is the key in the success of NCR's JIT process; September; p. 30.
Eighth annual auto ID equipment buyer's guide; September; p. 50.
The portable database debate; Fales, James F.; November; p. 27.
Who cares about data collection?; Fales, James F.; September; p. 16.

BEHAVIORAL SCIENCE AND ERGONOMICS
Applying behavioral science of the second kind; Barnes, Frank; March; p. 14.

CELLULAR MANUFACTURING
Northern Telecom tackles successful implementation of cellular manufacturing; Taheri, Javad; October; p. 38.

COMPUTER INTEGRATED MANUFACTURING
A company-wide perspective to identify, evaluate, and rank the potential for CIM; Kaeli, James K.; July; p. 23.
"Hands-off" manufacturing transcends limits of CIM; Groves, Chris; August; p. 29.
Know how to choose the right CIM system integrator; Kaltwasser, Carl; July; p. 27.

COST ACCOUNTING
Improved product costing: a look beyond traditional financial accounting; Sourwine, Darrel A.; July; p. 34.
Traditional cost accounting needs some adjustments . . as easy as abc; Gilligan, Brian P.; April; p. 34.

DECISION SUPPORT SYSTEMS
Use an electronic spreadsheet as a decision support system; Seila, Andrew F.; Banks, Jerry; May; p. 40.

ENGINEERING ECONOMY
A microcomputer program for computing standard criteria in engineering economy; Khajenoori, Soheil; Awoniyi, Samuel; February; p. 53.

ENVIRONMENTAL AND PLANT ENGINEERING
Hazardous wastes, subtitle D, and what's ahead in the 90s; Beckman, Thomas J.; February; p. 49.

FACILITIES PLANNING AND DESIGN
Airline parts operation improves facilities management; Ferguson, Gary A.; December; p. 31.
Assessing solution efficiency for quadratic assignment problems; Khaopravetch, Kumphol; Nanda, Ravinder; April; p. 51.
Facility and capacity planning using sales forecasting by today's industrial engineer; Butler, Michael P.; June; p. 52.
Interactive graphics offer an analysis of plant layout and material handling systems; Labban, Jihad; Sly, David; Tamashunas, Victor M.; June; p. 38.
Redesigning an existing layout presents a major challenge - and produces dramatic results; Ciesielski, C.A.; Johanson, Ralph A.; Usher, John S.; June; p. 45.

FLEXIBLE MANUFACTURING SYSTEMS
Analysis of data requirements for FMS implementation is crucial to success; Badiru, Adedeji B.; October; p. 29.
Flexible manufacturing . . from a different perspective; Sonntag, Victoria; November; p. 58.
The critical imperative in flexible manufacturing is information; Rhodes, Dusty; October; p. 44.

INDUSTRIAL ENGINEERING AND IEs
Moscow diary: star is rising for industrial engineering and industrial engineers; Badiru, Adedeji B.; August; p. 26.
The role of women, minorities and the handicapped in the engineering sector; Edosomwan, Johnson A.; Forbes, Lincoln H.; September; p. 47.

INFORMATION SYSTEMS
Developing five-year trends in logistics information systems; Gustin, Craig M.; July; p. 45.
Is there a place for IE in software development?; Jinkins, Richard D.; Rummel, Patricia A.; December; p. 27.
The competitive advantage is provided by integrated information systems; Trino, Joe; February; p. 36.
IIE
IIE annual report 1989-90; July; p. 50.
IIE 1990-91 board of trustees; June; p. 61.
IIE honors and awards; June; p. 68.
IIE officers: 1990 - 1991; March; p. 49.
IIE San Francisco conference concentrates on competitiveness in a transnational environment; August; p. 13.
INVENTORY MANAGEMENT
Modifying the abc inventory system for a focused factory; Shields, Jerry D.; Willis, T. Hillman; May; p. 38.
Personal computer tools for effective inventory management; Jaede, Eric K.; Pettis, John; Scott, Lenna; April; p. 41.
Production control software manages product diversity and inventory tracking; July; p. 39.
Try contracted line delivery for inventory management; Singh, D.K.; February; p. 47.
JUST-IN-TIME
America in search of a competitive advantage in world class manufacturing; Sutton, John R.; May; p. 14.
From total chaos to total quality; Sutton, John R.; September; p. 18.
Rearranging the furniture; Sutton, John R.; June; p. 12.
Start with the people; Sutton, John R.; August; p. 16.
The factory: a home away from home?; Sutton, John R.; December; p. 14.
Total prevented maintenance; Sutton, John R.; October p. 18.
MANAGEMENT
Are you a good decision maker? Ransom, Wm. J.; August; p. 20.
Are you really ready to build a project team?; Kezsbom, Deborah S.; October; p. 50.
Competition in the 1990's will demand bold moves from industry management; Stahl, John F.; September; p. 24.
How can an industrial crisis be managed effectively; Kabak, Irwin W.; Siomkos, George J.; June; p. 18.
Moscow diary: taking the adventure out of soviet joint ventures; Boznak, Rudolph; November; p. 31.
Opportunity assessment and planning process works for EG&G's group problem solving; Collins, Sharon K.; August; p. 40.
The power of ethical engineering; Ransom, Wm. J.; October; p. 20.
There is power in learning to listen; Ransom, Wm. J.; December; p. 18.
Texas Instruments goes all-out in efforts to strengthen its planning process chain; Barry, John; Fisher, Nathan; December; p. 41.
Your key to success in the competitive marketplace? unlocking employee potential; Agarwal, Ajay; August; p. 40.
MANUFACTURING
A rules-based system performs features and options system in a complex C-T-O environment; Dinitz, Michael; November; p. 22.
Assembly line balancing . . let's remove the mystery; Milas, Gene H.; May; p. 31.
Configure-to-order: an industry challenge; Dinitz, Michael; July; p. 21.
Enterprise logistics help make-to-stock manufacturers;Turner, Jerry; July; p. 43.
Fast cycle manufacturing: how to develop an effective manufacturing plan; Mehta, Anjan C.; April; p. 22.
How to tell if your manufacturing operations are non-competitive; Peterson, Leroy D.; January; p. 41.
Meet the new competitors: they think in terms of speed-to-market; Vesey, Joseph; December; p. 20.
1990s - - years of promise, years of peril for U.S.manufacturers; Seal, Gregory M.; January; p. 18.
Software systems must meet the complex requirements of configure-to-order manufacturing; Dinitz, Michael; September; p. 20.
Strategic manufacturing plan? your competitiveness depends on it; Danzyger, Howard; February; p. 19.
MATERIAL HANDLING
AGVs are flexible and trainable; Sims, Ralph ; December; p. 16.
Material flow is money flow; Sims, Ralph; August; p. 18.
MH problems are business problems; Sims, Ralph; May; p. 16.
Something to consider for the 90s: what about MH equipment standards?; Sims, Ralph; April; p. 18.
METHODS ENGINEERING
Update: simultaneous engineering design in Japan; Kuo, Way; Hsu, J.P.; October; p. 23.
PRODUCTIVITY
Facility productivity today can be planned, measured and controlled - do it; Stahl, John F.; June; p. 28.
Machines can only produce as efficiently as the people who operate them; Vierling, Albert E.; February; p. 24.
Printer incorporates Deming - reduces errors, increases productivity; Ferguson, Gary A.; August; p. 32.
Productivity implementation management must start with commitment from the top; Whitman, Alan R.; August; p. 23.
QUALITY CONTROL
JIT and quality assurance form the new partnership in manufacturing operations; Gupta, Yash P.; Wilborn, Walter W.O.; December; p. 34.
QUALITY MANAGEMENT
A computer-aided approach to manufacturing quality; Gettings, Marty; March; p. 18.
A systems approach to total quality management; Badiru, Adedeji B.; March; p. 33.
Enhance competitiveness and customer satisfaction . . here's one approach; Denton, D. Keith; May; p. 24.
Quality customer service: a strategic marketing weapon for high performance banking; Calvert, Jerry; November; p. 54.
Westinghouse Electric asks "what if?" with modeling at its productivity center; June; p. 22.
What's ahead for productivity and quality improvement; Rossler, Paul E.; Sink, D. Scott; March; p. 25.
SIMULATION
Advanced factory simulation boosts design, implementation for GE aircraft engines; Rucker, David; April; p. 30.

Balance maintenance costs against plant reliability with simulation modeling; Concannon, Kieran H.; Jardine, Andrew K.S.; McPhee, John; January; p. 22.
Honeywell puts simulation to work in multiple arenas; Dwyer, John; Korwin, Steve; October; p. 33.
Hong Kong air cargo terminals work in synch because of simulation applications; Luk, Maria; November; p. 42.
How to build valid, credible and appropriately detailed simulation models; Law, Averill M.; April; p. 16.
Hughes Aircraft designs automated storeroom system through simulation application; Gogg, Thomas; Sands, Charles D.; August; p. 49.
Models of random machine downtimes for simulation, part 1; Law, Averill M.; August; p. 58.
Models of random machine downtimes for simulation, part 2; Law, Averill M.; September; p. 22.
Push, pull and squeeze shop floor control with computer simulation; Brown, Steve; Ramsay, Martin L.; Tabibzadeh, Kambiz; February; p. 39.
Secrets of successful simulation studies; Law, Averill M.; McComas, Michael G.; May; p. 47.
Simulation changes the way industry thinks about planning; Laughery, Ron; June; p. 50.
Simulation improves firm's competitive edge and increases productivity; Schroer, Bernard J.; Stafford, Edward F.; Wilbanks, John; January; p. 32.
Simulation in the automotive industry; Law, Averill M.; November; p. 19.
Simulation software for manufacturing applications; Law, Averill M.; July; p. 18.
Simulation software for manufacturing applications: the next few years; Law, Averill M.; June; p. 14.

STORAGE REQUIREMENTS

Efficient storage system enhances Jaguar's productivity; November; p. 46.
Physical resource availability figured into EOQ formulations cuts warehouse logistics cost; Ntuen, Celestine A.; May; p. 20.
Publishing company uses special pallet rack; April; p. 26.
Simulation determines storage requirements at Reynolds Tobacco company; Camp, Robert E.; January; p. 28.
Storage requirements are determined through the use of simulation; Camp, Robert E.; March; p. 44.

SYSTEMS INTEGRATION

From CIM to IMS spelled success at 3M; Waldoch, Tom; February; p. 31.

TECHNOLOGY

Conveyors improve efficiency tied in to auto plant computer; June; p. 25.
Technological innovation: what's wrong? what's right? what's next?; Rouse, William B.; April; p. 43.

WAREHOUSE AND DISTRIBUTION OPERATIONS

An operating plan is critical in distribution center design to minimize risks of change; Wilde, Brian; November; p. 37.
Determine how many AGV's are needed; Lin, James T.; March; p. 53.
Eastman Kodak streamlines its product distribution; September; p. 42.
Proper planning and simulation play a major role in proper warehouse design; Senko, James M.; Suskind, Peter B.; June; p. 34.
Radio frequency data systems improve in materials handling and warehouse operations; Moynihan, Tim; September; p. 34.

WORK MEASUREMENT

An IE speaks out about the outcry to abolish most work measurement systems; Richmond, Martin; December; p. 47.
Considerations in developing standards for long cycle assembly; Horne, Russell; Mayo, William; March; p. 38.
Managing implementation of MIL-STD 1567A in fabrication shops; Carmean, Terry; Herriman, Harold; Reiter, Julius; June; p. 56.
Using excell spreadsheet software to design and conduct a work; Lund, John; January; p. 47.

Authors
